

S075 : Pocket shear vane devices

STANDARD : ASTM D2573-94

Designed for the rapid determination in the field or in the laboratory of shear strength of cohesive soils. The dial indicates directly the shearing strength in Kg/cm².

Complete with interchangeable stainless steel vane, 10x20 mm (Ø x height).

Weight: 300 g

Two models available, depending on the dial range:

- **S075:** dial range 0-1 Kg/cm²
- **S076:** dial range 0-2 Kg/cm²

Spare part :

S076-01 Stainless steel vane
