

C190 : Plasticity meter

Used for quick and easy measurements of the plasticity of mixtures, especially concrete, and so to detect rapidly any excess of water.

The measuring system is related to the shear strength applied by a three blade head to the mixture under test.

It is possible to measure the plasticity at several different points, and directly in the mixture, with multiple checking, and obtained values can be easily compared with the values got by the slump Abrams cone test.

Dimensions: Ø 130x180 mm

Weight: 2 kg
