

# B058 : Thermostatically controlled water bath

Provides water at the required temperature of  $25 \pm 0.1^{\circ}\text{C}$ .

The unit consists of a stainless steel water bath 10 litres capacity with wool insulation, immersion heater with digital thermostat, motor pump with connections, cooling coil device, current water operated, to maintain a constant temperature of the bath when room temperature is slightly higher.

The bituminous sample is immersed into the water bath, and placed on the penetrometer only at the time of the test, by eventually using the transfer dish (accessory mod. B057-03).

**Power supply:** 230 V 1 ph 50/60 Hz 350 W

**Dimensions:** 375x335x420 mm

**Weight:** 12 kg

## Accessory :

**B058-01** Water bath dish
