

B072 : Ring and Ball Softening Point Apparatus

STANDARDS : EN 1427, ASTM D36, AASHTO T53, NF T66-008, BS 2000, UNI 4161, DIN 52011, UNE 7111

The softness of bitumen depends, amongst other factors, on the substance temperature, the more the temperature increases, the more increases the softness of the bitumen. The unit consists of a pyrex beaker, brass frame, two tapered rings, two ball centering guides and two balls.

B072

Spare parts :

B072-03 Spare steel ball

B072-04 Brass tapered ring

B072-05 Ball centering guide

B072-06 Pyrex beaker

Accessories :

B072-01 Thermometer ASTM 15C range -2°C+80°C DIV. 0,2°C

B072-02 Thermometer ASTM 16C +30°C +200°C

B072-07 Pouring plate
